Att. : To whom it may concern

Subject : Crystalline H2O pool water maintenance product.

Dear Sir, Madam,

Our military base located in St-Jean sur Richelieu, Quebec, has the largest building in the Armed forces. It boast a large pool which accounts for over half a million gallons of water, over 2 millions liters.

For soon 10 years, we have been using the Crystalline H2O product for the maintenance of our swimming pool and we are very satisfied. Our clientele is also very satisfied. The water is soft, clear and odorless. Microbes and bacterias are controled and maintenance is easier. We realize 25% of chlorine economy because our clientele bathes in all kinds of extraordinary conditions including military uniforms, boots and all kinds of special equipment and thus requires a higher level of chlorine.

We know that we could realize even better economies, but special requirements issued by all the National defense departments involved in this matter implement extraordinary conditions since we have an extraordinary usage of our pool.

It is with pleasure and without any reservation that we recommand the use of Crystalline H2O product for any kind of swimming pool.

Very truly yours,

Roger Fredette, Surintendant  
Royal Military College St-Jean,  
National Defense
